**DETAILED ACTION**

***Response to Communication(s)***

1. This Office Action is in response to the RCE filed on May 12<sup>th</sup>, 2009. Claims 2, 9-16, 27-34, 45-52 and 55 are now canceled. Claims 1, 3-8, 17-26; 35-44 and 53-54 are now pending in the application.

***Response to Amendment/Arguments***

2. The 35 U.S.C. 102 rejection to claims 1, 3-8, 17-26, 35-44 and 53-54 have been withdrawn in light of applicant's amendment filed on 17 April 2009. Applicant's arguments filed on April 17<sup>th</sup>, 2009 with respect to claims 1, 3-8, 17-26, 35-44 and 53-54 have been considered but are moot in view of the new ground(s) of rejection.

***Allowable Subject Matter***

3. Claims 1, 3-8, 17-26, 35-44 and 53-54 are allowed. The following is a statement of reasons for the indication of allowable subject matter:

The Applicants' comments/arguments in the response filed 04/07/08 (see REMARKS, pages 11-12) have been fully appreciated and considered. The prior art of record, considered individually or in combination, does indeed fail to fairly show or suggest the claimed system (claims 1 and 53), apparatus (claim 17) and method (claim 35), comprising "a network including a plurality of wireless communication apparatuses that operate in an autonomous distributed manner without any of the wireless communication apparatuses being a specific controlling

station, the at least one of the wireless communication apparatuses including system comprises a transmitting-side or receiving-side communication apparatus which attempts to perform communication in a predetermined bandwidth, issues a notification indicating a setting of a period during which availability of the predetermined bandwidth is guaranteed in a communication range so that any other communication apparatus that receives the notification does not perform a communication operation in the predetermined bandwidth during the guaranteed period, wherein, for each predetermined frame period, regardless of whether the wireless communication apparatus system is the transmitting-side or the receiving-side communication apparatus, the wireless communication apparatus system transmits beacon information that describes information regarding the guaranteed period.” structurally and functionally interconnected with other limitations in a manner as recited in claims 3-8, 18-26, 36-44 and 54.

4. Reference(s) U.S.7,302,227 B2; U.S.7,489,651 B2; U.S.2007/0165589 A1; U.S.2004/0043780 A1; U.S.2005/0276243 A1; and U.S.2008/0212547 A1, are cited because they are put pertinent to the transmission control in the wireless communication system. However, none of references teach detailed apparatus, system and method as recited in claims 1, 17, 35 and 53.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
